SUMMARY

Career changer into software engineering, developing skills in research, problem-solving, and learning independently. I value how knowledge is shared to achieve common goals and seek a junior role to grow and contribute.

SKILL

LANGUAGE

- TypeScript
- JavaScript
- SQL
- HTML
- CSS3

FRONTEND

- Next
- React
- Responsive Design

BACKEND

- Node
- Express
- Nest
- Zod

DATABASE

- PostgreSQL
- SQLite

TESTING

- Vitest
- Jest

TOOL

- VS Code
- Git
- Github
- Linux
- Postman
- Docker

EDUCATION

SZECHENYI ISTVAN UNIVERSITY - SOFTWARE ENGINEER BSC

Beginning a part-time Software Engineer degree in **fall 2026** (ongoing) to deepen my understanding.

UDEMY: JAVASCRIPT ALGORITHMS AND DATA STRUCTURES MASTERCLASS

Completed in **march 2026**. A comprehensive JavaScript-based course covering essential data structures and algorithms with clear explanations and plenty of coding exercises by Colt Steele.

SCRIMBA: THE BACKEND DEVELOPER PATH

Completed in **february 2026**. practical backend curriculum covering Web Architecture, Async development, Backend frameworks, Databases, CyberSecurity, DevOps and DSA through project-based learning.

SCRIMBA: THE FULLSTACK DEVELOPER PATH

Completed in **january 2026**. interactive curriculum covering Frontend, Backend, Database, Testing and AI fundamentals through coding exercises and real project builds.

UDEMY: GIT & GITHUB BOOTCAMP

Completed in **october 2025**. thorough introduction to version control with Git and GitHub, covering branching, merging, rebasing, and collaborative workflows by Colt Steele.

UDEMY: THE LINUX COMMAND LINE BOOTCAMP

Completed in **october 2025**. A practical introduction to the Linux command line, covering essential commands, file system navigation, permissions, scripting, and working effectively in a terminal environment by Colt Steele.
